Letters of Support

United States Senate

WASHINGTON, DC 20510

July 17, 2018

The Honorable Elaine L. Chao
Secretary
U.S. Department of Transportation
1200 New Jersey Avenue, S.E.
Washington, DC 20590

Dear Secretary Chao:

I am writing to express my support for the application submitted by the Memphis Area Transit Authority for funding through the Better Utilizing Investments to Leverage Development (BUILD) grant program.

The officials with the Memphis Area Transit Authority tell me their proposal, the Memphis Innovation Corridor Project, will increase the travel options for residents in low income and central city neighborhoods throughout the Memphis area. The Memphis Innovation Corridor Project will make it easier for Memphians to access their jobs, educational opportunities, and more affordable housing.

I hope you will give all due consideration to the Memphis Area Transit Authority's application. I'd be glad to furnish additional information, or your office may wish to be in touch with Lucas Da Pieve of my staff at (202) 224-4944.

Sincerely,

Lamar Alexander
United States Senator

July 13, 2018

The Honorable Elaine L. Chao
Secretary
U.S. Department of Transportation
1200 New Jersey Avenue, SE
Washington, DC 20590

Dear Secretary Chao:

I am writing in regard to the Memphis Area Transit Authority's (MATA) application for funding through the Better Utilizing Investments to Leverage Development (BUILD) program. (DTOS59-18-RA-BUILD1)

As a large urban area with a low population density, the City of Memphis faces unique challenges in providing quality public transportation. The addition of a high poverty rate highlights the need for quality public transportation in Memphis. If awarded funding, MATA would develop the city's first rapid transit corridor. This corridor would connect low income neighborhoods with access to job and education centers in the city. This new connection would allow for a greater utilization of the city's workforce.

I appreciate your attention in this matter and hope you will give this proposal all due consideration. Please keep me informed about the progress of this proposal and when a decision is made. If you have any questions, please do not hesitate to contact Holt Edwards with my office at (202) 224-3344.

Sincerely,

Bob Corker
United States Senator

July 18, 2018

The Honorable Elaine L. Chao
Secretary of Transportation
U.S. Department of Transportation
1200 New Jersey Avenue, SE
Washington, DC 20590

Dear Secretary Chao:

I would like to offer my support for the City of Memphis and Memphis Area Transit Authority (MATA) application for the 2018 Better Utilizing Investments to Leverage Development (BUILD) Transportation grant. A successful 2018 BUILD application will help Memphis to more quickly implement a planned public surface transportation project expected to spur further private investment and public use. This project will provide a solution that utilizes the most promising technology and best practices to deliver transportation and help incentivize development that will fill the gaps of blight and chronic disinvestment.

The Memphis Innovation Corridor Project, or Innovation Corridor, is recommended after three years of studying how best to increase high-frequency travel options to access decent jobs, quality educational opportunities, and affordable housing. This important project will serve as an east-west trunk line that will connect low-income and central city neighborhoods to employment and education centers. It connects with the streetcar service returning to downtown and midtown, bicycle and pedestrian projects such as the TIGER IV Main to Main grant and bike share system, and existing transit services and the next planned rapid transit corridor. Lastly, the Innovation Corridor provides solutions to one of the top civic challenges emerging in our Memphis 3.0 Comprehensive Plan: better transit and infrastructure.

Developing this transportation network will connect public and private investments totaling billions of dollars between Downtown Memphis and the University of Memphis, and along the Innovation Corridor including the Memphis Medical District, a recent HUD Choice Neighborhood Implementation Grant, and several large retail and hotel projects along Union Avenue.

Should you or your staff have any questions regarding support for this project, please contact me or my staff at (202) 225-4714.

Sincerely,

David Kustoff
Member of Congress

RE: Memphis, Tennessee and MATA 2018 BUILD Application

Dear Secretary Chao:

I am writing to offer my support for the City of Memphis and Memphis Area Transit Authority (MATA) application for the 2018 Better Utilizing Investments to Leverage Development (BUILD) Transportation grant. In a sprawling city with a land mass of 347 square miles and poverty rate above 26%, connecting more citizens to opportunity and growing economic activity, while also addressing safety, infrastructure, and needs of the future are top priorities in our community. A successful 2018 BUILD application will help Memphis to more quickly implement a planned public surface transportation project expected to spur further private investment and public use. This project will provide a multimodal solution that utilizes the most promising technology and best practices to deliver transportation and help incentivize development that will fill the gaps of blight and chronic disinvestment.

The City of Memphis and MATA, with the support of many partners, are applying to develop and sustain the city's first rapid transit project, the Memphis Innovation Corridor Project (Innovation Corridor). This project is recommended after three years of studying how best to increase high-frequency travel options to access decent jobs, quality educational opportunities, and affordable housing. The Innovation Corridor will serve as an east-west trunk line that will connect low income and central city neighborhoods to employment and education centers. The Innovation Corridor connects with other modes such as streetcar service returning to downtown and midtown; to bicycle and pedestrian projects such as the TIGER IV Main to Main grant and bike share system; and to existing transit service and the next planned rapid transit corridor. In addition, it provides solutions to one of the top civic challenges emerging in our Memphis 3.0 Comprehensive Plan: better transit and infrastructure.

Developing this transportation network will connect public and private investments totaling billions of dollars between Downtown Memphis and the University of Memphis, and along the Innovation Corridor including the Memphis Medical District, a recent HUD Choice Neighborhood Implementation Grant, and several large retail and hotel projects along Union Avenue. 2018 BUILD will help Memphis greatly accelerate goals to build density, spur infill development, increase access to transit and other modes of transportation, and most of all getting more of our citizens to work.

Once again, I offer my strong support for the City of Memphis and Memphis Area Transit Authority in their application for the 2018 BUILD Transportation Grant. Thank you for making this opportunity available to America's communities. We appreciate your favorable consideration of our application.

As always, I remain,

Most sincerely,

RE: Memphis, Tennessee and MATA 2018 BUILD Application

Dear Secretary Chao:

On behalf of AutoZone, I am pleased to support the application from the City of Memphis and the Memphis Area Transit Authority (MATA) for the 2018 Better Utilizing Investments to Leverage Development (BUILD) Transportation grant.

AutoZone is one of the largest employers in downtown Memphis and we have worked diligently to support a pedestrian and transit friendly environment for our employees and business partners. The proposed Bus Rapid Transit connecting the University District, Midtown, Medical Center, and Downtown will definitely facilitate reduced traffic congestion, travel times, and air pollution.

We encourage your favorable consideration of the City of Memphis and MATA grant application.

Sincerely,

RE: Memphis, Tennessee and MATA 2018 BUILD Application

Dear Secretary Chao,

On behalf of ServiceMaster Global Holdings, Inc., I am pleased to support the application from the City of Memphis and the Memphis Area Transit Authority (MATA) for the 2018 Better Utilizing Investments to Leverage Development (BUILD) Transportation grant.

ServiceMaster opened its new corporate headquarters in downtown Memphis this year after a national search for our new facility. We located in downtown in part to provide a pedestrian oriented vibrant environment for our employees. The proposed Bus Rapid Transit route from the University of Memphis area to downtown complements the environment we are trying to offer our employees and will enable many to use transit for their home to work trip without using their personal vehicle.

We support the plan and encourage the U. S. Department of Transportation to award the grant requested by the City of Memphis and MATA.

Respectfully,

A handwritten signature in blue ink, appearing to read 'Tom Campbell', written over a horizontal line.

RE: Memphis, Tennessee and MATA 2018 BUILD Application

Dear Secretary Chao:

On behalf of St. Jude Children's Research Hospital, I am pleased to support the application from the City of Memphis and the Memphis Area Transit Authority (MATA) for the 2018 Better Utilizing Investments to Leverage Development (BUILD) Transportation grant.

St. Jude is a world class research and treatment hospital for childhood catastrophic diseases and has its main campus in the downtown area in relative proximity to the proposed Bus Rapid Transit (BRT) line. Our campus includes approximately 4,500 employees and tens of thousands of patient and family visits each year. The proposed BRT will facilitate access for our employees living along this corridor. It will also enable out of town family members that may arrive without personal transportation to conveniently access the hospital and their family members.

We urge you to approve the Memphis and MATA application and will continue to support progressive commuter options including the BRT.

Sincerely,

Robert R. Clark
Chief Government Affairs Officer

RE: Memphis, Tennessee and MATA 2018 BUILD Application
Dear Secretary Chao:

Please accept this letter as an expression of support for the City of Memphis and Memphis Area Transit Authority (MATA) application for the 2018 Better Utilizing Investments to Leverage Development (BUILD) Transportation grant. In a sprawling city with a land mass of 347 square miles and poverty rate above 26%, connecting more citizens to opportunity addresses one of the greatest transportation needs in our community.

The vision of this project is to provide a multimodal solution that utilizes the most promising technology to deliver public transportation that will assist many Memphians to get to work and provide tourists with access to major streets with many different attractions and anchor organizations, such as our institution Methodist University hospital. As the academic teaching hospital, located in the heart of Memphis, we support this proposal and consider ourselves partners as the proposed dedicated route will operate on Union Avenue near our organization which will be beneficial to both our patients and associates. As a community hospital system serving Memphis residents for 100 years, we're truly invested in providing access to all and encouraged to see the City of Memphis and MATA, apply to develop and sustain the city's first rapid transit project, the Memphis Innovation Corridor Project (Innovation Corridor).

I understand this project is recommended after three years of studying how best to increase high-frequency travel options to access jobs, quality educational opportunities, and affordable housing. It is exciting to see the vision behind the Innovation Corridor addressing critical needs in our City like connecting low income and central city neighborhoods to employment and education centers. Innovative solutions are necessary in the midst of civic challenges in an urban area like Memphis, such as transportation, and I hope you will look favorably upon this application. Thank you in advance for your consideration.

RE: Memphis, Tennessee and MATA 2018 BUILD Application

Secretary Chao:

On behalf of Southwest Tennessee Community College (STCC), I am pleased to support the application from the City of Memphis and the Memphis Area Transit Authority (MATA) for the 2018 Better Utilizing Investments to Leverage Development (BUILD) Transportation grant.

Southwest Tennessee Community College is in the Medical Center area, which is virtually in the center of the corridor in question. We have over 10,500 students, faculty and staff; and accommodating our students with parking is a challenge. The Bus Rapid Trait route would be a great enhancement to enable STCC to use transit and significantly reduce the use of personal vehicles associated parking problems.

We request that you award this grant to the City of Memphis and MATA and we are confident the project will be highly successful.

Respectfully,

RE: Memphis, Tennessee and MATA 2018 BUILD Application

Dear Secretary Chao:

On behalf of our 2,000 member companies, I am pleased to support the application from the City of Memphis and the Memphis Area Transit Authority (MATA) for the 2018 Better Utilizing Investments to Leverage Development (BUILD) Transportation grant.

The proposed Bus Rapid Transit route will link our largest university with the medical center and downtown Memphis. The Memphis Medical Center is not only a major health care complex but also houses a concentration of students for the University of Tennessee, Southwest Tennessee Community College, and a number of hospital sponsored nursing programs.

In general, this corridor is one of our largest employment centers and the BRT will enhance home to work trips as well as educational, governmental and recreational activities.

We urge your support of the grant and look forward to working with U. S. Department of Transportation on making this a highly successful project.

Sincerely,

Philip H. Trenary
President and CEO

The Innovation Corridor connects with other modes such as streetcar service returning to downtown and midtown; to bicycle and pedestrian projects such as the TIGER IV Main to Main grant and bike share system; and to existing transit service and the next planned rapid transit corridor. In addition, it provides solutions to one of the top civic challenges emerging in our Memphis 3.0 Comprehensive Plan: better transit and infrastructure.

Developing this transportation network will connect public and private investments totaling billions of dollars between Downtown Memphis and the University of Memphis, and along the Innovation Corridor including the Memphis Medical District, a recent HUD Choice Neighborhood Implementation Grant, and several large retail and hotel projects along Union Avenue. 2018 BUILD will help Memphis greatly accelerate goals to build density, spur infill development, increase access to transit and other modes of transportation, and most of all getting more of our citizens to work.

Thank you for making this opportunity available to America's communities. We appreciate your favorable consideration of our application.

Sincerely,

Scott A. Brockman, A.A.E

RE: Memphis, Tennessee and MATA 2018 BUILD Application

Dear Secretary Chao:

Please accept this expression of support for the City of Memphis and Memphis Area Transit Authority (MATA) application for the 2018 Better Utilizing Investments to Leverage Development (BUILD) Transportation grant. In a sprawling city with a land mass of 347 square miles and poverty rate above 26%, connecting more citizens to opportunity and growing economic activity, while also addressing safety, infrastructure, and the needs of the future are top priorities in our community. A successful 2018 BUILD application will help Memphis to more quickly implement a planned public surface transportation project expected to spur further private investment and public use. This project will provide a multimodal solution that utilizes the most promising technology and best practices to deliver transportation and help incentivize development that will fill the gaps of blight and chronic disinvestment.

The City of Memphis and MATA, with the support of many partners, are applying to develop and sustain the city's first rapid transit project, the Memphis Innovation Corridor Project (Innovation Corridor). This project is recommended after three years of studying how best to increase high-frequency travel options to access jobs, quality educational opportunities, and affordable housing. The Innovation Corridor will serve as an east-west trunk line that will connect low income and central city neighborhoods to employment and education centers. The Innovation Corridor connects with other modes such as streetcar service in downtown and midtown; to bicycle and pedestrian projects such as the TIGER IV Main to Main grant and bike share system; and to existing transit service and the next planned rapid transit corridor. In addition, it provides solutions to one of the top civic challenges emerging in our Memphis 3.0 Comprehensive Plan: better transit and infrastructure.

Developing this transportation network will connect public and private investments totaling billions of dollars between Downtown Memphis and the University of Memphis, and along the Innovation Corridor including the Memphis Medical District, a recent HUD Choice Neighborhood Implementation Grant, and several large retail and hotel projects along Union Avenue. 2018 BUILD will help Memphis greatly accelerate goals to build density, spur infill development, increase access to transit and other modes of transportation, and most of all getting more of our citizens to work.

Thank you for making this opportunity available to America's communities. We appreciate your favorable consideration of our application.

RE: Memphis, Tennessee and MATA 2018 BUILD Application

Dear Secretary Chao:

Please accept this expression of support for the City of Memphis and Memphis Area Transit Authority (MATA) application for the 2018 Better Utilizing Investments to Leverage Development (BUILD) Transportation grant. In a sprawling city with a land mass of 347 square miles and poverty rate above 26%, connecting more citizens to opportunity is a top priority for our community. Equally important is growing economic activity, while also addressing safety, infrastructure, and needs of our future. A successful 2018 BUILD application will help Memphis to more quickly implement a planned public surface transportation project expected to spur further private investment and public use. This project will provide a multimodal solution that utilizes the most promising technology and best practices to deliver transportation and help incentivize development to fill the gaps of blight and chronic disinvestment.

The City of Memphis and MATA, with the support of many partners like the Downtown Memphis Commission, are applying to develop and sustain the city's first rapid transit project, the Memphis Innovation Corridor Project (Innovation Corridor). This project is recommended after three years of studying how to best increase high-frequency travel options to access decent jobs, quality educational opportunities, and affordable housing. The Innovation Corridor will serve as an east-west trunk-line that will connect low-income and central city neighborhoods to employment and education centers. The Innovation Corridor connects with other modes such as trolley service returning to downtown and midtown Memphis; to bicycle and pedestrian projects such as the TIGER IV Main to Main grant and bike share system; and to existing transit service. In addition, it provides solutions to one of the top civic challenges emerging in our Memphis 3.0 Comprehensive Plan: better transit and infrastructure.

Developing this transportation network will connect public and private investments totaling billions of dollars between Downtown Memphis and the University of Memphis, and along the Innovation Corridor including South City, a recent HUD Choice Neighborhood Implementation Grant, and several large retail and hotel projects along Union Avenue. Connecting these important Downtown neighborhoods is critical to building the density we need to create a robust city core. 2018 BUILD will help Memphis greatly accelerate goals to build this density, spur infill development, increase access to transit and other modes of transportation, and most of all getting more of our citizens to work.

Thank you for making this opportunity available to our community. We appreciate your favorable consideration of our application.

Respectfully,

Jennifer Oswald, President & CEO

RE: Memphis, Tennessee and MATA 2018 BUILD Application

Dear Secretary Chao:

The Memphis Medical District Collaborative is pleased to support the City of Memphis' and Memphis Area Transit Authority's (MATA) application for the 2018 Better Utilizing Investments to Leverage Development (BUILD) Transportation grant. In a city with a land mass of 347 square miles and poverty rate above 26%, connecting more citizens to opportunity and growing economic activity, while also addressing safety, infrastructure, and needs of the future are our top priorities. This is especially true in the Memphis Medical District, a 2.5 square mile area of the city with eight large medical, educational, and research institutions educating and employing more than 24,000 people.

A successful 2018 BUILD application will help Memphis quickly implement a public surface transportation project expected to spur further private investment and public use. This project provides a multimodal solution that uses technology and best practices to deliver transportation and incentivize development. The City of Memphis and MATA, with the support of many partners, are applying to develop the city's first rapid transit project, the Memphis Innovation Corridor Project (Innovation Corridor). The Innovation Corridor will increase high-frequency travel options to connect people to jobs, educational opportunities, and affordable housing options. The Innovation Corridor will be an east-west line that connects low income and central city neighborhoods to employment and education centers. The Innovation Corridor will also connect with other existing modes of transportation such as streetcar service; bicycle and pedestrian projects such as the completed TIGER IV Main to Main grant; the city's new bike share system; and existing transit service. This Innovation Corridor connects billions in private and public investments between Downtown Memphis and the University of Memphis, including the Memphis Medical District, a HUD Choice Neighborhood Implementation Grant, and several retail, residential, and hotel projects.

2018 BUILD will help Memphis accelerate goals to build density, spur infill development, increase access to transit, and most of all get more of our citizens to work. Thank you for making this opportunity available to America's communities. We appreciate your consideration of our application.

Sincerely,

Thomas A. Pacello
President, Memphis Medical District Collaborative

RE: Memphis, Tennessee and MATA 2018 BUILD Application

Dear Secretary Chao:

On behalf of the City of Memphis and Memphis Area Transit Authority (MATA), please accept this expression of support for the 2018 Better Utilizing Investments to Leverage Development (BUILD) Transportation grant application. In a sprawling city with a land mass of 347 square miles and a poverty rate above 26%, connecting more citizens to opportunity as well as growing economic activity are top priorities in our community – all the while addressing safety, infrastructure and future needs. A successful 2018 BUILD application will help Memphis to more quickly implement a planned public surface transportation project, expected to spur further private investment and public use. This project will provide a multimodal solution that utilizes the most promising technology as well as best practices to deliver transportation. We firmly believe this will help incentivize development that will fill the gaps of blight and chronic disinvestment.

With the support of many partners, The City of Memphis and MATA are applying to develop and sustain the city's first rapid transit project: the Memphis Innovation Corridor Project. After three years of studying how to best increase high-frequency travel options to access decent jobs, quality educational opportunities and affordable housing, this project is being recommended. The Innovation Corridor will serve as an east to west trunk line, connecting low income and central city neighborhoods to employment and education centers. The Innovation Corridor connects with other modes, such as: streetcar service returning to downtown and midtown; bicycle and pedestrian projects, such as the TIGER IV Main to Main grant and bike share system; and existing transit service as well as the next planned rapid transit corridor. In addition, it provides solutions to one of the top civic challenges emerging in our Memphis 3.0 Comprehensive Plan: better transit and infrastructure.

Developing this transportation network will connect public and private investments, totaling billions of dollars between Downtown Memphis and the University of Memphis. This includes the Innovation Corridor in the Memphis Medical District, a recent HUD Choice Neighborhood Implementation Grant, as well as several large retail and hotel projects along Union Avenue. The 2018 BUILD will help Memphis greatly accelerate goals to build density, spur infill development, increase access to transit as well as other modes of transportation, and most of all: getting more of our citizens to work.

Thank you for making this opportunity available to America's communities. We appreciate your favorable consideration of our application.

Sincerely,

Steve J. Bares, Ph.D.
President & Executive Director
Memphis Bioworks Foundation

RE: Memphis, Tennessee and MATA 2018 BUILD Application

Dear Secretary Chao:

Please accept this expression of support for the City of Memphis and Memphis Area Transit Authority (MATA) application for the 2018 Better Utilizing Investments to Leverage Development (BUILD) Transportation grant. In a sprawling city with a land mass of 347 square miles and poverty rate above 26%, Memphians need better connections to opportunity and growing economic activity. As these connections are built, system improvements should prioritize safety, infrastructure and flexibility for future needs. A successful 2018 BUILD application will help Memphis more quickly implement a planned public surface transportation project expected to spur further private investment and public use.

The City of Memphis and MATA, with the support of many partners, are applying to develop and sustain the city's first rapid transit project, the Memphis Innovation Corridor Project (Innovation Corridor). This project is recommended after three years of studying how best to increase high-frequency travel options to access living wage or better paying jobs, quality educational opportunities, and affordable housing. The Innovation Corridor will serve as an east-west trunk line that will connect low income and central city neighborhoods to employment and education centers. The Innovation Corridor connects with other modes such as streetcar service returning to downtown and midtown; to bicycle and pedestrian projects such as the TIGER IV Main to Main grant and bike share system; and to existing transit service and the next planned rapid transit corridor.

This investment in transportation provides solutions to one of the top civic challenges cited in the Memphis 3.0 Comprehensive Plan: better transit and infrastructure. The BUILD project will provide a multimodal solution built on leading technology and best practices to deliver transportation and help incentivize development that will fill the gaps of blight and chronic disinvestment. Developing this transportation network will connect public and private investments totaling billions of dollars between Downtown Memphis and the University of Memphis, and along the Innovation Corridor, including the Memphis Medical District, a recent HUD Choice Neighborhood Implementation Grant, and several large retail and hotel projects along Union Avenue. 2018 BUILD will help Memphis greatly accelerate goals to build density, spur infill development, increase access to transit and other modes of transportation, and most of all, get more of our citizens to work.

As partners with MATA and the City of Memphis on the Memphis 3.0 project, as well as on other neighborhood development projects, civic tech projects and mobility projects, Innovate Memphis fully

supports this application as a significant investment in transportation that can be leveraged for further growth and neighborhood development.

Thank you for making this opportunity available to America's communities. We appreciate your favorable consideration of our application.
