

On-Call Streetcar Rail System Engineering Services

RFP #21-11

Request for Clarification and Approved Equals

MATA responses to the following questions are in red:

- Section 2.3 (page 7) says “cost proposals should be provided in a separately sealed envelope”, but Section 5.5 (page 10) says “A price proposal will be requested from the top ranked proposal.” Please clarify if a cost proposal is required at the time of submission?

The proposal is requested at the time of submission. The requested price proposal will be the finalized proposal cost before awards are given. This is the period where we will discuss the breakdown of proposed cost and determine other cost factors as needed.

- Is a cover allowed? If so, are photos allowed on the cover?

Cover is allowed. No photos on cover.

- In Section 3.1 (In the Proposal Format section), #3 states to provide resumes for personnel who are expected to be utilized and to provide summaries of relevant experience and proposed roles for key personnel. There is also a stated max of 5 pages. Do resumes count toward the 5 page total in this section or can they be added in addition?

Resumes will not count towards the 5 pages; however please keep the resume functional and only down to work history, professional experience, education, and certifications.

- Section 2.1 identifies architectural services for architectural design related to trolley stops. What elements are intended to be covered under architectural related services?

All elements for the trolley stop/stations should be considered, foundations to roof / canopy roof.

- Also please note the email provided to contact you on page 9/53 has a typo.
